

Parental Mental Health and Child Welfare Network

Overall Aim

To improve the lives of children in England affected by parental mental ill health

Specific Aims

1. To increase viability of the Network as a self-sustaining enterprise

2. To improve accessibility to the resources of the Network

3. To improve good practice across all disciplines

4. To increase competence and confidence of practitioners working with families with mental health needs

5. To increase recognition of the Network as the resource for best practice on families affected by mental ill health

Outcomes

Objectives

To fundraise sufficiently to enable the Network to be self-sustaining

To develop and facilitate an online discussion group for practitioners on family mental health

To develop the potential of the Network website

To work in partnership with other key national organisations & networks on key messages (news, research & other devts) emerging from network activities

To develop the Network as a resource for specialist research on family mental health issues

To provide national & local training events according to Network members' identified priorities

Outputs
